DETAILED ACTION

Election/Restrictions

1. Claim 1 is generic to a plurality of disclosed patentably distinct species comprising:

Species A1, Method for treating hepatitis C;

Species B1, Method for prevention of hepatitis C.

Once one of the two alternative methods has been elected, applicants are requested to respond to the following species requirement:

Species A2 when variable B is a purine,

Species B2 when variable is a pyrimidine.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

Art Unit: 1623

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
